EDUCATION

• Sreenidhi Institute of Science and Technology

B.Tech, Computer Science and Engineering – Cybersecurity

◦ CGPA: 8.79 / 10.00

2022 – 2026

Hyderabad, India

• Alphores Junior College

Intermediate, MPC

◦ Percentage: 97.3%

2020 – 2022

Karimnagar, India

WORK EXPERIENCE

• Infosys

Systems Engineer Intern – Big Data

- Completed intensive Big Data training at the Infosys Global Education Centre, working hands-on with Python and PySpark to process large datasets in a distributed environment
- Built interactive dashboards in Power BI for data visualization and worked with MongoDB for NoSQL storage and querying in enterprise data workflows

Jan 2026 – May 2026

Mysore, India

• Rablo

Mobile Application Developer Intern & Team Lead

- Developed features for two Flutter applications and integrated RESTful APIs for reliable frontend–backend communication
- Led a small team of developers, distributed tasks across modules, and delivered assigned work within project deadlines
- Onboarded and mentored junior interns, which improved team collaboration and overall development speed

Oct 2024 – Jan 2025

Lucknow, India (Remote)

PROJECTS

• CAX – Unified Student Engagement Platform

Flutter, Spring Boot, MongoDB

- Building a cross-platform student platform for club management and college event management, owning everything from system design to deployment
- Implemented secure user authentication with college email verification, deployed the backend on AWS, and published the app on the Google Play Store

• Vortex Pay – Digital Wallet

Spring Boot, Flutter, PostgreSQL

- Built a full-stack digital wallet supporting UPI-style transfers, QR payments, and real-time notifications, backed by ACID-compliant transactions in PostgreSQL
- Handled concurrent transfers using pessimistic locking with ordered lock acquisition and retries, preventing data corruption under high load

• Student Bio Data Management System

Java, JDBC, PostgreSQL, CLI

- Built a CLI-based CRUD application in Java using JDBC and PostgreSQL, following a layered Model–DAO–Service architecture with parameterized queries to prevent SQL injection
- Added search, email validation, delete confirmation, and automatic database setup on first run

SKILLS

- **Programming Languages:** Java, Dart, Python
- **Frontend Development:** HTML, CSS, Flutter
- **Backend & Databases:** Spring Boot, MongoDB, SQL
- **Tools:** Git, PySpark, Power BI

CERTIFICATIONS & ACHIEVEMENTS

- **App Publication:** Built and published CAX on the Google Play Store with 100+ users
- **Udemy:** Flutter & Dart – The Complete Development Bootcamp | MySQL – The Complete Developer’s Guide
- **HackerRank:** Java (Basic) certification – core Java programming and problem solving
- **LinkedIn Learning:** HTML & CSS Foundations | JavaScript Essential Training
